

THIRD-PARTY APIs INTEGRATION

1. Shipment Tracking API:

- o Purpose: To track shipment status for customer orders.

- o Integration Steps:

1. Select API (e.g. ShipEngine).
2. Authenticate using API keys.
3. Use endpoints to fetch tracking data (status, estimated delivery, etc.).
4. Display tracking details on the frontend.

2. Payment Gateway API:

- o Purpose: To securely process payments.

- o Integration Steps:

1. Choose a gateway (e.g., Stripe or PayPal).
2. Configure API settings and set up webhooks for transaction updates.
3. Implement secure payment forms.
4. Handle success and error responses effectively.
